“Smart Solutions for a Smarter Villages”

1. Introduction:

As part of **ENIF 6.0**, a Technical Challenge will be organized under the theme “Smart Solutions for Smarter Villages.”

This challenge aims to encourage participants to develop **innovative startup ideas that address real problems faced by rural communities in Tunisia** through smart, sustainable, and technology-driven solutions.

Participants will work in teams to identify real challenges affecting villages and propose solutions that have the potential to evolve into viable and impactful startups.

The challenge will last for 15 days, from April 15th to May 1st, during which teams will develop their ideas, structure their solutions, and prepare their startup presentations and supporting documents.

2. Challenge Theme:

“Smart Solutions for Smarter Villages”

The challenge focuses on developing innovative technological solutions that improve life in villages and rural areas in Tunisia.

Participants are encouraged to design solutions that leverage modern technologies and entrepreneurial thinking to address key challenges affecting rural communities.

Possible domains include (but are not limited to):

- Smart Agriculture
- Rural Healthcare
- Water Management
- Renewable Energy
- Smart Mobility
- Digital Education
- Environmental Sustainability
- Rural Connectivity
- Smart Infrastructure

Participants are free to explore any innovative idea aligned with the theme.

3. Challenge Objectives

The Technical Challenge aims to:

- Encourage entrepreneurship and startup creation among participants
- Promote innovative technological solutions addressing real-world problems.
- Support the development of impactful solutions for rural communities in Tunisia.
- Introduce participants to startup development methodologies.
- Train participants on important startup tools such as:
 - Business Model Canvas (BMC)
 - Pitch Deck preparation
- Encourage teams to integrate United Nations Sustainable Development Goals (SDGs) into their solutions.
- Promote collaboration, creativity, and innovation.

4. Scope of the Challenge

The challenge is open to participants interested in:

- Technology and innovation
- Entrepreneurship
- Social impact
- Sustainable development

Participants are invited to propose startup ideas that solve real problems faced by villages in Tunisia.

Solutions may involve technologies such as:

- Artificial Intelligence
- Internet of Things (IoT)
- Blockchain
- Data Analytics
- Web or Mobile Applications
- Embedded Systems
- Smart Devices

Teams should focus on developing solutions that are innovative, feasible, and capable of creating a positive impact on rural communities.

5. Challenge Timeline

The Technical Challenge follows the timeline below:

- April 15th – Official launch of the challenge
- April 15th – May 1st – Teams work on developing their startup ideas and preparing the required deliverables
- May 1st – Submission deadline for all deliverables
- May 3rd – Final pitching session during ENIF 6.0 at ENIS

To support participants, online mentoring sessions will be organized during the challenge to guide teams on:

- How to develop a Business Model Canvas (BMC)
- How to build an effective Pitch Deck

These sessions aim to help participants structure their startup ideas and prepare for the final pitching session.

6. Required Deliverables

Each participating team must submit the following materials before May 1st.

6.1. Business Model Canvas (BMC)

A clear representation of the startup's business model including:

- Value Proposition
- Customer Segments
- Channels
- Customer Relationships
- Key Activities
- Key Resources
- Key Partners
- Cost Structure
- Revenue Streams

6.2. Pitch Deck Presentation

A presentation summarizing the startup idea, including:

- Problem addressed
- Proposed solution
- Value proposition
- Target users
- Market opportunity
- Business model
- Expected impact

6.3. Technical Report

A document describing the technical aspects of the proposed solution, including:

Technical Challenge Specification Book

IEEE

ENIS
IEEE Student Branch

IEEE ENIS Industrial Forum 6.0

“Smart Solutions for a Smarter Villages”

- System or solution architecture
- Technologies used
- Technical approach
- Implementation strategy
- Description of the prototype (if developed)

Optional Deliverables

Teams may also submit:

- **Prototype of the solution**
- **Video demonstration** showcasing the prototype or concept

These optional elements can help teams **better illustrate their ideas and demonstrate the feasibility of their solutions.**

7. Final Pitching Session

The final pitching session will take place on the **D-Day of ENIF 6.0**, on **May 3rd at ENIS.**

During this session, each team will present their startup idea to a **jury panel.**

Teams will pitch their solutions using their **Pitch Deck presentation.**

The presentation should clearly explain:

- The problem addressed
- The proposed solution
- The value of the startup
- The business model
- The expected impact on rural communities

8. Evaluation Criteria

Teams will be evaluated based on several criteria, including:

- Innovation and creativity
- Relevance of the problem addressed
- Impact on rural communities
- Feasibility of the solution
- Quality of the business model
- Technical feasibility
- Quality and clarity of the final presentation

9. Registration

All participants must complete their registration through the official Google Form shared by the organizers.

Only registered teams will be eligible to submit their deliverables and participate in the final pitching session.

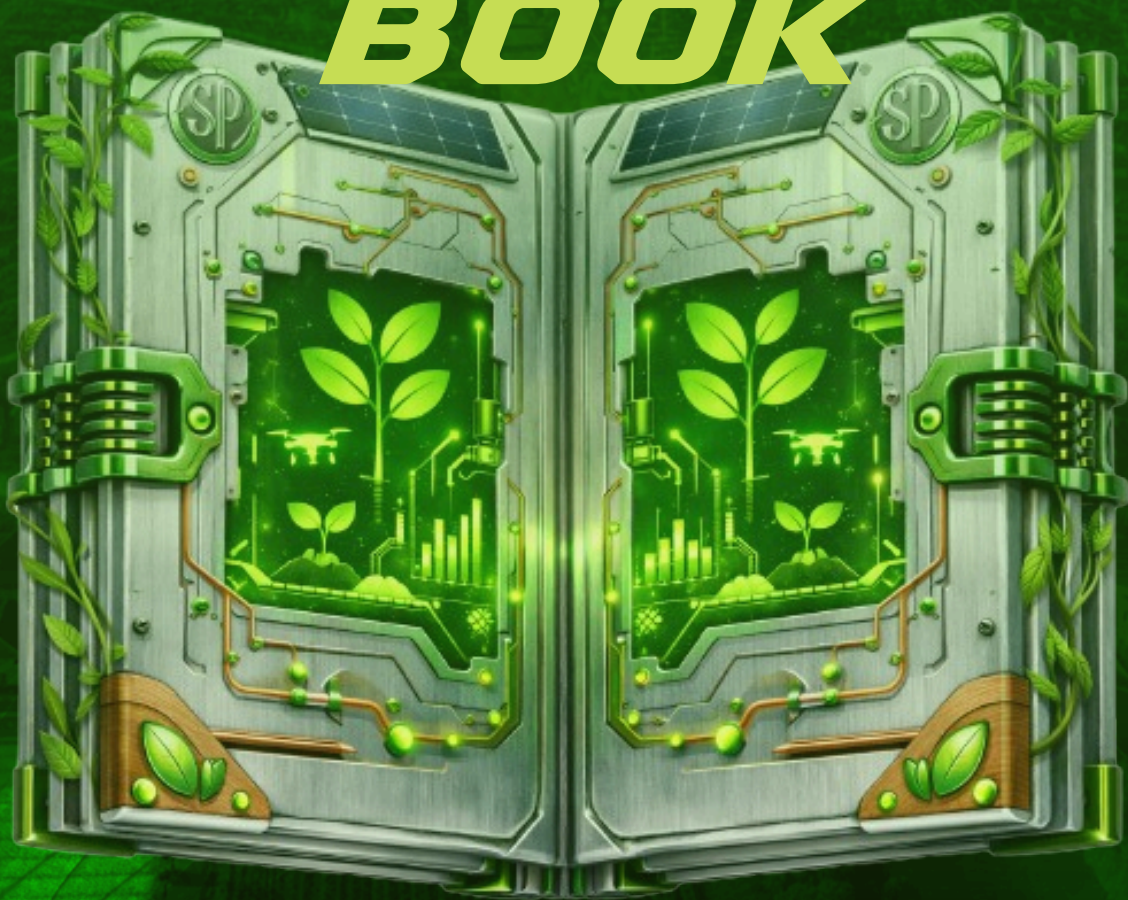

Teams that do not complete the registration process will not be considered in the evaluation process.

Registration Form (deadline:25/04/2026)

Submission Form (deadline: 01/05/2026)
